Amendments to the Specification:

Please amend paragraph [0016] as follows:

[0016] In a further embodiment these devices are advantageously

assembled in a single packaged circuit. Thus, at least some of the additional

sensors, the calculator and the invention-related sensor device form a compact,

[[are]] standardized and therefore low cost telematics platform. In addition to the

invention-related sensor device the platform comprises the in-vehicle component

of a centrally based navigation and management system and/or the road impact

fee calculator.
